

Avail-TVN

Digital Media Services

The most comprehensive end-to-end solution for licensing, managing, and distributing digital video.

Avail-TVN's managed services allows you to move into next-generation video delivery seamlessly, while giving your customers a better television experience.

- Make better use of your existing bandwidth, allowing for growth of services such as HD
- Provide a platform upon which you can build to offer additional Avail-TVN products and services
- Minimize investment in physical plant upgrades

The Avail-TVN solution includes a full line-up of live television programming with hundreds of channels, all quality-encoded in MPEG-4, IP-encapsulated, encrypted, combined with VOD, and designed for future value-added services. Avail-TVN possesses an extensive content library, including transport rights from the top national programmers, including ABC-Disney, Turner, NBC Universal, MTV Networks, Fox Cable Networks as well as On Demand content from every major studio such as Buena Vista / Disney, DreamWorks, Lionsgate NBC Universal, Paramount, Sony, 20th Century Fox, and Warner Bros and television network, as well as content only available On Demand. Avail-TVN also offers a proprietary software suite, ViewTrak™, which allows both carriers and content providers the ability to track programming activations on a real-time basis. Avail-TVN's solutions have been designed for and are today used by digital video providers of all types.

Transport

Avail-TVN manages the distribution of all assets via its internally developed Secure Satellite Transport (SST) system, the industry's first platform-independent, secure point to multi-point digital content satellite distribution system. Transmitting via Intelsat's Galaxy 28 satellite, Avail-TVN's SST offers reliable, secure multicast delivery of all digital content. Through the use of unique site addresses and a fully encrypted signal, we ensure that content is delivered in its entirety only to authorized sites.

VOD

Avail-TVN's programming partners include every major movie studio, premium and basic cable television network, broadcast television networks, as well as providers working only in On Demand.

- A selection of over 10,000 hours of VOD content and 300 channels of linear MPEG4 content from more than 200 content providers
- Programming partners include every major movie studio, premium and basic cable television network, and broadcast television networks

Pay-Per-View Complete

Pay-Per-View Complete is Avail-TVN's fully-comprehensive pay-per-view platform offering affiliates a total of eight channels of events, movies and mature programming. Designed for systems which are not VOD enabled, Pay-Per-View Complete offers a flexible solution for providing quality transactional content.

- Low cost solution for enhanced pay-per-view services
- Flexible pay-per-view channel lineup allowing you to customize your channels for each of your markets
- Ability to create linear channels from locally-stored playlist assets
- Live pass-through of events
- Extensive top-level marketing support
- 100% managed service hosted at Avail-TVN's super-headend which includes:

- ADONISS content management
- Remote pay-per-view scheduling
- Channel creation and remote and local system management interfaces
