openGear OG-X-FR
Compatible Rackframe

NEW!

OG-X-FR
openGear Compatible Rackframe

openGear is an open architecture, modular frame system designed by Ross Video and supported by a diverse range of terminal equipment manufacturers, including AJA Video Systems.

The AJA OG-X-FR is a 2RU high openGear frame which is compatible with any openGear card and offers Dashboard support for the latest AJA Dashboard compatible for the latest AJA openGear cards. The frame has a 20-slot capacity

with excellent cooling capabilities and power handling for high-density applications, with support for the latest high-bandwidth technologies.

OG-X-FR ships with a power supply included. When seeking redundancy for extra security in critical environments, order an additional OG-X-PS power supply.
