

PEG PLUS

HD PEG Channel Encoder with HD-SDI or Composite Video, L & R Audio Input / IP Output

R.L. Drake's **PEG PLUS** encoder is a stand-alone MPEG-2 or H.264 digital video PEG channel encoder with a single SD/HD-SDI, or composite video with left and right audio input, and an IP-encapsulation output via a single SFP Ethernet port. A separate RJ45 10/100 Ethernet port is provided for control and monitoring. Video encoding is available in MPEG-2 or H.264 and PCM-embedded audio can be encoded to either Dolby® Digital, MPEG1-Layer 2 stereo, or AAC stereo. The PEG encoder is capable of outputting two HD or SD streams in either codec with resolutions of 480i, 720p, and 1080i. Powered by a separate 110V AC power unit, the **PEG PLUS** is a small, modular, desktop model.

The **PEG PLUS** encoder is available with an optional Zixi output protocol that provides the ability to stream content in H.264 format over an unmanaged network, including the public internet. The Zixi UDP based video-optimized protocol provides professional broadcasters, sports networks, and service providers a mechanism to adapt to the public internet using standard IP networks as a way to ingest and transport broadcast quality video.

1 Source of MPEG-2/H.264 Content

via SD/HD-SDI or Composite Video with Left + Right Audio

1 IP-Encapsulated Data Stream

via Ethernet Cable (RJ45 Port)

MULTI-POINT DISTRIBUTION

PEG ENCODER LOCALLY ORIGINATED CONTENT

FEATURES

- Composite video with left and right audio input
- HD-SDI or SD-SDI input
- Encodes 2 HD and SD stream of the same content in either MPEG-2 or MPEG-4 / H.264 formats
- Resolutions of 480i, 720p, or 1080i
- Dolby® Digital, AAC stereo audio, or MPEG1-Layer 2 stereo audio encoding from PCM-embedded audio source
- IP output via SFP port (SFP optional-see back)
- Unicast and multicast capable
- Separate Management port and streaming port
- Field-upgradable firmware
- Configuration and shutdown control via HTTP server UI and programmable API
- Built-in watchdog timer with system reboot capability
- User defined PID configuration
- Supports ATSC PSIP tables
- DVB Service Information table generation (NIT+SDT)
- Desktop model
- SNMP V2
