# Infovalue BizTV™

*Info Value BizTV™ is a state-of-the-art turnkey IPTV system for enhancing communications and training with high quality video portals by facilitating TV programs, video broadcasting, video recording, video-on-demand and video announcements.*

BizTV is entirely IP and digital media based and is tailor-made for enterprises and government agencies.  BizTV empowers organizations to incorporate TV programs, video broadcasts, and video-on-demand into their communications and training.  BizTV also allows organizations to operate information portals to enliven working environments with sharing of knowledge, experiences and interesting information among employees.

BizTV is ideal for organizations to incorporate digital media to improve training, communications, and acquisition of new information.  Organizations can incorporate high quality TV programs, produce internal programs, record those programs and include them in their video library.  Organizations can use internal video announcements to communicate with employees and provide timely guidance in response to any unusual situations.  Employees can improve their understanding of organization directions and operations via self-paced on-demand reviews or relevant titles from the video library.

BizTV features InfoValue's industry leading IPTV platform, ensuring seamless integration with authentication and access control, unparalleled scalability and open architecture for future expansion.  BizTV has integrated Digital Signage and mobile/tablet device support to further assist organizations to effectively communicate with their employees.  BizTV has field-proven reliability and manageability that can be trusted with cost-effective 24x7 operations.
