

CSS-59M

Coax Cable Stub End Stripper 15mm/6mm

The CSS-59M is a coaxial cable stripper specifically designed to strip the stub end of a mini coax cable in a wall outlet, exposing 9 mm of braid and 7 mm of the center conductor, which eliminates the need to run new cable. This coaxial cable stripper features the following:

- Easy to use: Simply insert cable, rotate like a screwdriver, and remove to strip
- Will not cut or damage the braid or score the center conductor
- High carbon steel blades last for over 5,000 strips on each side
- Hook and loop strip on bottom of tool is used to fold back braid on cable after being stripped
- Can be used with other blade cartridges, such as the CSS-105/110/115/120/125/130
- Replacement cartridge for this tool is: CSS-135

Blade Replacement Instructions:

- To replace blade cartridge: open jaws and push upwards on the front of the blade cartridge. Cartridge will lift out.
- To install new blade cartridge: insert cartridge into tool and close jaws. Give the jaws a squeeze to insure the blade locks into place.

Specifications

Cable Type	Mini COAX
Cable Size	Mini COAX
Strip Length	Exposes 9 mm braid and 7 mm center conductor
Length	4" (100mm)
Weight	0.13 lbs (58.97g)
UPC No.	811490018044
