

MS Series
Mid Span Splitters

Mid Span Splitters

These **PATENTED** tools are designed to open fiber jackets and loose buffer tubes to provide easy fiber access. The buffer tube slitting is done without damage to the fiber. Blades are replaceable. Note: MS-326 is designed for cables used in ducts and microducts.

Simple to use:

- Select the correct groove. Grooves marked with the recommended fiber size
- Place the fiber in the groove to be used
- Note: The arrow on the top of the tool indicates the pulling direction and the line indicates the blade location
- Close the tool making sure lock is engaged and pull to slit the fiber
- For ring operation repeat steps above and, instead of pulling, rotate the tool 3-6 times to ring the cable
