AC-FXHD-KIT
Fox & Hound A/V Testing & Troubleshooting Kit

This 18Gbps Generator and Analyzer Testing and Troubleshooting Kit was built as the ideal testing unit for all custom and commercial integrators. The Fox & Hound Test Kit comes with an 18Gbps Generator and 18Gbps Analyzer. These tools allow you to confirm correct bandwidth, HDCP, resolution, timing, HDR metadata and many more options that could cause system hiccups if not treated correctly.

Sure, there are pricey test instruments available with a multitude of features, most of which the average integrator is not going to use. That is why we set out to develop a simple, affordable solution to troubleshoot system issues. **The Fox & Hound: A/V Testing and Troubleshooting Kit** is a product that can produce and analyze the newest and highest resolutions - 4K60 at 18Gbps. It's also affordable enough for every integrator to have on any install/service call!

HOW IT WORKS: Place the generator in place of your source, and set the analyzer in place of your sink. These units will then read the data being sent throughout the system. The Fox & Hound can run any type of signal through the unit and confirm that same signal is being passed through the product with no changes. This will diminish calls to support and replacement of products! Troubleshooting is a breeze—never worry if a cable or extender is bad, again! Not to mention, it's fast—have your answer to a potential problem in less than a minute.
