

SLC2716L

Active 16:1 L-Band Combiner With Integrated Line-Amplifier

GENERAL

The SLC2716L is a 16:1 L-Band combiner with an integrated line-amplifier built into a compact 1RU/19" rack-mount chassis. The unit features 16:1 L-Band combining while the amplifier allows variable gain adjustment so to reach best RF performance within the network. Besides the variable gain adjustment (MGC/AGC) and 16:1 combining the unit also features slope-equalization, 10MHz external reference, RF power monitoring as well as 1:1 redundant power-supply (hot-swappable). The SLC2716L features a flexible and compact RF-distribution solution which is perfectly suited for applications in Teleports, Satellite Earth-Stations, as well as Broadcast- and Broadband facilities wherever accurate RF power, highest stability and availability is necessary. The unit has a front-side LC-Display/keypads for user-friendly local configuration while front-side status LED's indicating power-supply status. Remote control and configuration can be done via its rear-side Ethernet-Interface (WEB-GUI, SNMP). The SLC2716L is available with 50Ohm SMA(f) or 75Ohm F(f) connectors (see order-information).
