

H30 EVOLUTION s n a l L e e l e t e r

Televés

ALL THE FUNCTIONS YOU NEED NOW ON YOUR SMARTDEVICE

The H30 EVOLUTION is a portable, rugged, and powerful handheld device that can be used on your smart device via Bluetooth Connectivity. This meter has the ability for multiscreen and remote control so you can work remotely or on a larger screen. You can also access the meter remotely via WiFi. With a bandwidth from 20 to 2350 MHz the meter has the capability to measure your TV Channels as well as Satellite. The meter measures and analyzes standard ATSC3.0 (option) QAM, IPTV, DVB-S, MPEG data, Constellation Information, Spectrum Analysis. It also does System Scan, Custom Channel Plans and you can set up Pass / Fail parameters. And of course you can save your test results via a USB 2.0 interface.
