

## FOTCK Fiber Optic Test & Cleaning Kit

**FOTCK is a tool kit specifically designed for the testing of installed fiber.**

**Now With New Improved Quality Light Source & Power Meter**

The FOTCK has been assembled to provide the technician responsible for the installation of the fiber optic transmitters and receivers in the system. The kit contains an optical power source and optical power meter to test the installed cable and connectors optical loss. A viewable light source is included to find damaged fiber and jumpers. A microscope is included to inspect connectors as is cleaning materials to clean dirty connectors, pigtails, jumpers and coupler fittings.

By testing and cleaning the installed fiber cable, you can be sure to have the proper signal levels and eliminate problems and damaged equipment.

### ***Kit Contains:***

- |      |   |
|------|---|
| (1)  | Toner OLS1315A Optical Light Source               |
| (1)  | Toner OPM1315A Optical Power Meter                |
| (1)  | Toner VFL650-10 Visible Light Source              |
| (1)  | Toner FOM-400 Microscope                          |
| (2)  | FC/UPC to SC/APC 1 Meter Singlemode Fiber Jumpers |
| (2)  | SC/APC Mating Sleeves                             |
| (1)  | Cletop-S Connector Cleaner                        |
| (1)  | Microcare DST Canned Air                          |
| (1)  | Microcare FCC-II Fiber Connector Cleaner Fluid    |
| (50) | Microcare S25 Fiber Cleaning Swabs                |
| (50) | Microcare MCC-FA1 Single Use Wipes                |
| (90) | Microcare WFW "Lint Free" Wipes                   |
| (1)  | Rugged Custom Carrying Case                       |
