EVMX244SL

HDMI 4x4 Multi-Format Matrix with Video Wall & Seamless Multiview

- High-performance matrix with multiple modes to produce seamless matrix switching, as well as having multiview, and video wall modes
- The switching mode of the matrix allows the speed of switching to be controlled allowing inputs to fade in and fade out
- Multiview mode allows all of the sources to be seen on the displays equally in Quad-view, or in PIP with a main source being larger than the other smaller sources

Powerful Video Wall Feature!

4 Sources to 1 screen!

Great for digital signage!
