FOTCK
Fiber Optic Test & Cleaning Kit

FOTCK is a tool kit specifically designed for the testing of installed fiber.

The FOTCK has been assembled to provide the technician responsible for the installation of the fiber optic transmitters and receivers in the system. The kit contains an optical power source and optical power meter to test the installed cable and connectors optical loss. A viewable light source is included to find damaged fiber and jumpers. A microscope is included to inspect connectors as is cleaning materials to clean dirty connectors, pigtails, jumpers and coupler fittings.

By testing and cleaning the installed fiber cable, you can be sure to have the proper signal levels and eliminate problems and damaged equipment.

Kit Contains:
