

## PAK Reliable SSD Recording Media

Pak Media is a high capacity Solid State Drive (SSD) encased in a protective housing with a rugged connection engineered to handle the rigors of repeated use in the field and multiple capacities from 256GB to 2TB to fit your needs. Utilize the AJA Pak Dock (sold separately) to transfer your footage over Thunderbolt™ or USB 3.0.

## PAK Media

File based recording means your files are your master copy - something you don't want to leave to chance. Pak Media uses a solid metal housing to protect the internal SSD drive from the bumps and bounces of field use, ensuring your media is secure. The reinforced connector is engineered for repeated insertion and removal cycles, unlike the connector built into SSD drives, which is designed primarily to be inserted into a computer and rarely removed. There are four Pak Media sizes available offering a balance between price and long recording needs and you may order the media as preformatted in either HFS+ or exFAT for fast deployment upon arrival..

## PAK Dock

External Pak Dock with Thunderbolt and USB 3.0 connections for fast transfer of media to a host computer.
