

Hardline Strip & Core Tools

Hardline Strip & Core Tools

The Jonard all-in-one Core/Strip tools provide a complete cable preparation solution for multiple types and sizes of hardline coax cables used in the Cable Television industry. These tools include a HJS jacket stripper that can be mounted at the front of the HCS Core/Strip tool which allows you to remove the jacket at the same time you are coring and stripping the cable. The HCS tools have an adjustable center conductor beveler and a stop to insure consistent coring lengths with a comfortable ratcheting handle. The jacket stripper is removable so you can use it as a standalone jacket stripper or just use the Core/Strip tool alone for non-jacketed cable. You can remove the ratcheting T handle so you can mount the Core/Strip tool in a drill for faster operation. The tool is rugged with an all-aluminum housing and rugged T shaped ratcheting handle. Blades are easily replaced as is the coring bit and beveler. Tools are designed to work on Commscope P3, QR and Times Fiber T10 and other similar cables.

Jacket Stripping Tools

The Jonard Tools HSC-QR series coaxial coring and stripping tools are a kit consisting of a jacket stripping tool and a HSC-QR series coring tool. These coring and stripping tools are specifically designed to work on Commscope Quantum Reach cables. The coring tool and jacket stripper are designed to allow the jacket stripper to be stored on the coring tool for convenience.

The HSC-QR series is a rugged tool with a heavy-duty aluminum body and special ratcheting handle for comfort. The stripping and coring blades are high carbon steel and heat treated for long life. The tool is designed to be easily used with a drill by simply removing the T handle.
