Torque Wrenches
The full head Torque Wrenches behave like traditional open end wrenches. Designed for "F" Connectors, these wrenches help prevent over tightening. An audible click tells you the F Connector has been torqued to the proper torque requirement. These wrenches all have angle heads, sized for $1 / 2 ", 7 / 16^{\prime \prime}, 9 / 16^{\prime \prime}$ applications, and are designed with an ergonomic cushioned handle for user comfort and protection. These wrenches work in tightening mode only. Note: Speed Head wrenches are designed to act like a ratcheting wrench, skipping over corners of nuts/bolts (allowing for continuous turning).

Torque Wrenches with Attached Security Shield Tool
The security shield tool is permanently attached, $43 / 4$ " $(120 \mathrm{~mm})$, and pivots in 90-degree increments.

These tools are ideal for hard to reach shielded F Connector fittings where a pre-set torque is required.

The TWAFST-71622 is set at $22 \mathrm{in} . / \mathrm{Ib}$ (2.49 NM)
The TWAFST-71630 is set at $30 \mathrm{in} . / \mathrm{lb}$ ( 3.39 NM )
