

EZF-11 RG11 Compression F Male Connector

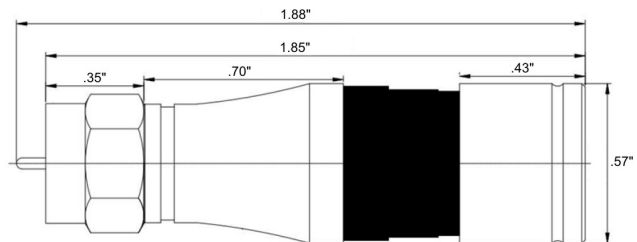

Features:

- One piece design
- Machined solid brass
- Nickel plating
- Universal 60% to quadshield
- 7/16" nut size
- Meets SCTE specifications

The EZF-11 connectors are one piece, compression type F connectors designed for easy installation on RG-11 coax cable. These connectors feature a precision machined brass body for strength and durability along with high RF shielding. They also feature an acetyl POM polymer compression mechanism for superior strength, cable retention and weather resistance.

These are universal type connectors that fit RG-11 cable from 60% braid to quadshield.

Specifications:

| Model | EZF-11 |
|-----------------------|-----------------------------|
| Bandwidth | 5-3000MHz |
| Impedance | 75ohm |
| Return Loss: Minimum | -30dB @ 1G |
| Insertion Loss | <0.1dB @ 1G |
| Operating Voltage | 90V (@ 60Hz continuous AC) |
| Operating Temperature | -40F to +140F (-40C to 60C) |
| Cable Retention | 40 lb |
| Material | Solid Brass Body |
| Finishing | Nickel Plated |
