

FOM-400 Fiber Inspection Microscope 400x Magnification

The FOM-400 is a precision optical microscope for inspecting the end face of fiber optic cables for damage or dirt. It features 400 X magnification so even the smallest amount of dirt or imperfection can be seen.

Specifications:

Magnification	400X
Connector	2.5 mm Universal
Light Source	White LED
Lighting	Coaxial
Power	3 AAA Batteries
Battery Life	< 40 Hours
Dimensions	9" long x 2.5" wide
Weight	1.3 lbs

CAUTION: Never look at the end of a piece of fiber unless you are 100% sure that there is no light on the fiber. It is best to secure the other end of the fiber.
